The Cleantech-Cluster

The Cleantech-Cluster (CTC) is the platform for energy and environmental technology companies in Upper Austria. It supports innovation, competitiveness and visibility of its partner companies. It contributes to market growth across the value chain in the fields of sustainable energy and environmental technologies.

Together, innovative, environmentally and economically sound solutions for the present and the future are developed and implemented. The cluster serves as an interface between companies, research and training institutions, decision-makers and users. The CTC initiates, promotes and coordinates the cooperation between more than 250 partner companies.

The Cleantech-Cluster builds upon the experiences and contacts of two successful networks (Ökoenergie-Cluster and Umwelttechnik-Cluster). Two specialised teams – situated at the OÖ Energiesparverband and Business Upper Austria – support the topics of energy and environmental technologies.

This guide presents the partner companies and institutions of the CTC and their key competencies.

OÖ Energiesparverband
Landstrasse 45
4020 Linz, Austria
Phone +43-732-7720-14380
cleantech-cluster@esv.or.at
ZVR 171568947

Business Upper Austria – OÖ Wirtschaftsagentur GmbH
Hafenstrasse 47-51
4020 Linz, Austria
Phone +43-732-79810-5214
cleantech-cluster@biz-up.at

www.cleantech-cluster.at
(Juni 2019)
Air pollution control

- planning, development, construction, operation and monitoring of filter systems, e.g. particle filters for cleaning exhaust air from various industrial processes
- extraction systems, dedusting systems
- catalytic after treatment systems, secondary combustion processes
- ventilation technology
- heat recovery
- analytics, measuring and monitoring

Architects + construction businesses

- new construction and renovation of single-family homes, apartment buildings as well as business, industrial and public buildings of all sizes
- integrated planning, construction and maintenance of high-efficiency buildings supplied by renewable energy sources by construction companies, architects, housing companies, installers, specialised planning companies
- specialised services (e.g. building thermography, building life cycle analysis, spatial planning), pilot and R&D projects

Bio-based industries

- physical, mechanical processes
- biotechnological processes (fermentation)
- thermochemical processes (gasification, pyrolysis of biomass)
- chemical processes
- wood and fibre production

Biomass

- automatised, low-emission wood pellet and wood chip boilers from home systems to large-scale installations, including district heating
- CHP systems using wood pellets and wood chips
- modern wood stoves and log wood boilers
- biomass fuels (pellets, wood chips) and related logistics, pellet trucks
- biogas and biofuels
- container systems (including boiler and fuel storage)
- fuel storage and transport systems, control systems, hot water tanks, fresh water modules
- flue gas cleaning and heat recovery systems
- hybrid systems (different biomass fuels, combinations with heat pumps)
- biomass contracting, specialised planning, maintenance and R&D

CTC competencies

 Manufacturers, distributors, installers, specialised consultants, researchers in:
Manufacturers, distributors, installers, specialised consultants, researchers in:

**Building materials + windows**
- manufacturing of building materials and components with a focus on efficiency and renewable materials
- bricks, thermal insulation, high-efficiency windows, roofing and facade materials, sun protection systems
- solar facades and roofs, timber construction

**Building services + energy management**
- products, components and planning of heating, ventilation, hot-water, cooling, air-conditioning, electric systems for buildings and plants of all sizes and purposes
- integrated engineering, automation and optimisation of building technologies including related infrastructure (e.g. IT, smart grids, e-mobility), smart building solutions
- renewable energy for new and existing building energy systems, optimising on-site consumption
- operation of energy systems for buildings and plants, quality management
- energy monitoring and management for visualisation, monitoring, analysis, documentation, billing, management of loads and consumption (software solutions, energy data management systems)
- training and consulting services, specialised R&D

**Corporate social responsibility**
- sustainable development and management, such as ISO26000, ISO50001 (energy management), ISO140001 (environmental management), resource and waste management, EMAS, OHSAS 18001 (occupational health and safety assessment)

**E-mobility**
- components and systems for charging electric vehicles
- solutions for optimising vehicle charging, building management and on-site renewable energy production in domestic and business buildings
Manufacturers, distributors, installers, specialised consultants, researchers in:

**Energy advice + consultancy + building certificates**
- energy advice, consultancy and audits for households, municipalities, businesses and industry
- energy performance certificates for residential & non-residential buildings
- energy strategies for municipalities and businesses
- feasibility studies, development assistance, due diligence, specialised support for funding programmes

**Energy efficient lighting**
- components and systems for efficient lighting (domestic, service buildings, industry) including LED lamps and luminaires
- street lighting
- specialised planning and engineering of new installations and retrofits, lighting services

**Heat pumps + geothermal**
- heat pumps (air-water, ground source, groundwater) for heating, ventilation and air-conditioning of small to large buildings, facilities and industrial processes
- heat recovery and ventilation systems for buildings and processes
- heat pumps optimised for combination with PV, solar thermal and smart pricing
- thermal storage systems and control systems, slinky ground collector systems

**Energy efficiency in industry**
- planning, engineering and implementation of industrial energy systems (production processes and buildings) including heating, hot water, cooling, ventilation, steam, heat recovery, dedusting, flue gas clearing with a focus on energy efficiency
- building and process automation and optimisation, life cycle analysis and space efficiency, energy performance contracting
- renewable energy for industrial energy systems (solar, biomass, heat pumps)
Manufacturers, distributors, installers, specialised consultants, researchers in:

**Hydro + wind**
- turnkey small hydropower plants with Kaplan, Francis and Pelton turbines
- automatisation, revitalisation and upgrading of existing small hydropower plants
- service, repair and maintenance of hydropower plants
- construction and repowering of wind farms, technical operation management
- measurement, evaluation and planning services for wind parks
- technical due diligence evaluations, feasibility studies, environmental impact studies for wind parks
- community-owned wind farms

**Plant design**
- planning, analysis, construction and execution of permission processes of industrial plants

**Research + education**
- universities, schools, research and educational institutions in energy and buildings
- associations and interest groups

**Soil protection**
- remediation and reactivation of landfills (in-situ, on-site and off-site processes)
- special films for landfill sealing
- revitalisation of former landfills
- analysis of soil and groundwater, expert reports
- remediation services for contaminated subsoil and groundwater
- biological products for soil revitalisation and activation

**Noise control**
- active and passive noise control measures, such as exhaust silencer for highly compressed gases or steam (e.g. for gas pipelines or power plants)
- analysis of sound emissions (measurements and calculations of sound propagation) and preparation of reports
- consultancy services on noise control measures
**Solar + energy storage**
- thermal solar collectors for hot water, space heating, swimming pools, cooling, drying, steam, thermal concrete core activation, industrial process heat
- PV from home systems to large-scale installations
- solar batteries, thermal storage, accumulators, fresh water modules
- solar system components (e.g. inverters, insulation materials, storage solutions, mounting solutions)
- control and management systems, systems to optimise solar consumption
- building-integrated solar solutions (roof, facades)
- solar consulting, planning, engineering, maintenance, R&D

**Sustainable production**
- optimisation of machines, processes and buildings
- material flow management and in-house recycling of materials
- sustainable and circular product design and material savings
- continuous improvement of resources and energy efficiency in production processes

**Waste logistics**
- collection and storage systems
- conveying systems
- disposal vehicles
Manufacturers, distributors, installers, specialised consultants, researchers in:

**Waste treatment**
- construction and operation of waste treatment, recycling and waste incineration plants
- production and operation of shredders for waste treatment
- waste technologies, analytics and treatment
- production of shredding and screening machines for recycling plants
- composting/treatment of biogenic waste (waste fertilizer, biogas plants)
- recycling (chemical substances (solvents), plastics (mixed plastic waste, high quality granules), construction waste, wood waste, scrap metals)

**Water supply + wastewater treatment**
- construction, operation and maintenance of water supply, treatment and disposal
- construction, operation and maintenance of wastewater treatment processes/installations (biological/chemical/mechanical)
- analytics, measuring and monitoring
- filter and membrane technologies
- sewage treatment plants, sewage sludge, sewage collection and drainage (sewer)
- river engineering (flood protection, renaturation)

**Wholesalers + suppliers**
- wholesale suppliers for environment, energy and building technologies and products, supply of components
- OEM manufacturers of energy and building products
abatec group AG
Oberregauer Strasse 48, A-4844 Regau
+43-7672-27720-0, info@abatec-ag.com
